

# EADARAPALLI YASWANTH VENKATA PAVAN

Machine Learning Passionate

**Mail:** eyvpavan1812@gmail.com    **Phone No:** 9177753624

**LinkedIn:** yaswanth-venkata-pavan-eadarapalli-625625344

## Objective:

---

Motivated engineering undergraduate with a strong foundation in computer science, programming, and problem-solving. Seeking an internship opportunity to apply technical skills, learn modern tools and technologies, and contribute effectively to real-world software and technology solutions.

## Education:

---

|                                                                                                        |                           |
|--------------------------------------------------------------------------------------------------------|---------------------------|
| <b>SRKR Engineering College, Bhimavaram.</b><br>BTech in Artificial Intelligence and Machine Learning. | <b>2024-2027</b><br>88.6% |
| <b>SMT.B. Seetha Polytechnic, Bhimavaram.</b><br>Diploma in Computer Management And Engineering.       | <b>2021-2024</b><br>95%   |

## Experience:

---

### AI Intern–Infosys Springboard

- Completed an 8-week certified internship in Artificial Intelligence through Infosys Springboard. Gained hands-on experience with Python, scikit-learn, and built a shipment delay prediction model deployed via Stream lit.

## Projects:

---

### Hospital Management System

Developed a modular Hospital Management System using Python and MySQL, applying OOP principles for scalability and maintainability. Key features include patient registration, doctor assignment based on specialization and availability, and secure medical record management.

### Home Automation Using IOT

Built a dual-mode home automation system using Arduino Mega, GSM and Bluetooth modules, and a relay board. Enabled remote appliance control via SMS and smartphone app, demonstrating skills in embedded systems, hardware integration, and communication protocols.

### Electricity Bill Estimation

Developed a machine learning model using regression algorithms to predict monthly electricity bills based on historical consumption, usage patterns, and seasonal trends. Focused on data preprocessing, model selection, and performance evaluation to deliver accurate cost estimates and actionable insights for energy management.

### Shipment Sure

Developed a machine learning classification model to predict shipment delays using supplier and order-level data. Conducted exploratory data analysis, feature engineering, and trained models including Logistic Regression, Random Forest, and XGBoost. Deployed a real-time prediction interface using Stream lit to assist logistics teams in improving delivery reliability and operational planning.

## Technical Skills:

---

### Frontend Development:

HTML5, CSS3, JavaScript, Dart, Flutter.

### Backend Development:

Node.js, Express.js, Python, Java, C, C++.

### Core Competencies:

Problem-solving, Clean code practices, team Collaboration, Git.

### Databases &Storage:

MongoDB, MySQL.

## Certificates:

---

- We won Second Prize for Home Automation using IoT at the District Level Tech Fest.
- Artificial Intelligence certification completion from Infosys Springboard.
- Received a certificate for completing industrial training at Franql in Tech Systems Pvt. Ltd.
